

**STOPS
FASTER.
FULL
STOP.**

**The fastest stopping time
on the market—because
when a limb is on the line,
every millisecond counts.**

- Unique dual sensing technology combines visual and touch sensing capability for reliable protection.
- On activation, BladeStop brings the blade to a full stop in less than 10 milliseconds—faster than any other safety bandsaw.
- Quickly restart after an activation, with no blade change required.
- High-end bandsaw for high-end products, designed for quality, hygiene, and safety.
- Real-time data for proactive safety available with BladeStop Connect.

Certified for safety

Protect your operators with the only safety bandsaw certified for functional safety, as evaluated by a third party-Certified for functional safety by DGUV.

Servicing and maintenance how (and when) you need it

As part of global automation company, Scott, we have access to a worldwide service network of trained BladeStop technicians to provide ongoing maintenance and staff training to keep your BladeStop in perfect condition for its full lifespan.

BladeStop was developed by Scott
in collaboration with MLA.
