OFS

OPERATIONS FEEDBACK SYSTEMS

Helping Manufacturers
Increase Efficiency
Sustainability & Profits

OFS (Operations Feedback Systems), founded in Australia in 2006, is a software solutions company committed to providing the tools to empower manufacturers to deliver flawless service excellence to their operations. This creates sustainable productivity improvements, profit improvements, and waste minimisation.

OFS software solutions deliver an integrated manufacturing operations feedback and paperless event driven workflow system that enriches sensor and machine data with context and observations from people. Our web-based technology presents beautiful visuals and promotes intuitive interaction, allowing everyone in your organisation to engage and be part of your company's efficiency journey. Importantly OFS has a very light IT touch, so deployment and upgrades are virtually painless.

Increase OEE
