

## About Brausch

Brausch was founded on April 1, 2003 by Glen “Brasha” Brausch, who realised the need for efficient and reliable service in the chilled transport industry. He started with one truck — a six-wheeler refrigerated truck — and grew it to the large fleet we have today.

In mid-2020, new owners were bought on board with the vision to take the business to next stage.

The business remains 100% Kiwi owned and Over 17 years our objective has remained the same: to reliably deliver chilled goods with care, on time, every time.

## THE ROAD AHEAD

Keeping our core values of reliability, dependability and sustainability at heart, Brausch is starting its next journey of growth.

As a board we are committed to making sure we deliver on our values to our customers while expanding our network so we can control our service levels and offer superior service nationwide.
