

FOOD GRADE COMPLIANCE IS EASY WITH CHEMZ

OUR NEW FOOD GRADE RANGE GIVES YOU PEACE OF MIND

The **Ministry for Primary Industries & AsureQuality** are more stringently enforcing their guidelines with regard to Food Grade Lubricants and their use. As **CHEMZ FOOD GRADE** range is **C15 & C26 approved** it can be applied to machinery without removing product from the production line so there's no costly downtime and **CHEMZ DNA** (Directional Nozzle Applicator) **System** allows for safe, precise application with no waste. **CHEMZ FOOD GRADE** range is also **NSF approved** giving exporters and the Dairy Sector peace of mind too. Your company is reliant on effective food processing and production for both export and local markets and your machinery is vital to your success. **CHEMZ** understands this, hence the new range of Food Grade Aerosols.

THE FOOD GRADE RANGE AND ITS ATTRIBUTES

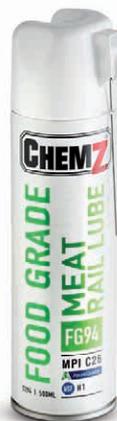

FG04 DRY FILM SILICONE - MPI C26

AsureQuality NSF H1 APPROVED

(400ml) Part No. 7204

A dry, non-sticking lubricant that is an excellent release and parting agent for use on food handling and sorting lines. It lubricates and protects therefore eliminating sticking, binding and squealing on rubber, plastic and metal parts. Leaves a dry fogging film which resists dirt and dust build-up providing good water and chemical resistance.

FG94 MEAT RAIL LUBRICANT - MPI C26

AsureQuality NSF H1 APPROVED

(500ml) Part No. 7294 - (5L) 7298 & (20L) 7299

High performance Meat rail spray formulated as a friction modifier for conveyor rails and transport chains subject to high temperatures and loads in the food industry allowing easy transfer of carcass gambrel skids and trolleys. Suitable from low temperatures 0°C up to 240°C assisting in corrosion and rust prevention.

FG44 LUBE 4 PENETRENE - MPI C15

AsureQuality NSF H1 APPROVED

(400ml) Part No. 7244 - (5L) 7248 & (20L) 7249

A multi-tasking product that lubricates, penetrates and stops corrosion on food processing equipment and machinery. The low viscosity of Lube 4 stops noisy squeaking and squealing. Penetrates effectively breaking free corroded components. It leaves a thin non-drying colourless film which is safe on most surfaces including plastics and rubber.

FG15 CRS (CONTAMINANT RELEASE SPRAY)

AsureQuality NSF H1 APPROVED

MPI C26 - (500ml) Part No. 7215

(5L) 7218 & (20L) 7219

High performance inert blend of chemicals formulated for the release of organic contaminants, dirt, grease, grime and oil from machinery and electrical equipment in the food industry.

FG24 BELT GRIP - MPI C26

AsureQuality NSF H1 APPROVED

(400ml) Part No. 7224

Suitable for incidental food contact. A tacky formulation which adheres strongly to belts assisting transmission efficiency and drive. Suitable for both indoor and outdoor belt applications irrespective of humidity or temperature conditions. The formulation keeps belts flexible, pliable and resistant to cracking, ensuring and extending the life of old belts.

FG54 HI TEMP CHAIN LUBE - MPI C15

AsureQuality NSF H1 APPROVED

(500ml) Part No. 7254

High performance chain spray developed for the lubrication of Roller, Drive & Bi-planer conveyor chains subject to high temperatures & loads in the food industry; slaughterhouses, bakers, beverage & food manufacturing etc. Exceptional resistance to high temperatures +240°C.

FG84 PTFE DRY LUBE - MPI C15

AsureQuality NSF H1 APPROVED

(400ml) Part No. 7284

Suitable for incidental food contact. Contains PTFE (Polytetrafluorethylene) based dry film lubricant and can be used where ever oil or silicone free lubrication is required. A white, non-toxic odourless film that provides a lubricated medium with low frictional properties and is unaffected by water, steam and most chemicals.

FG64 HI-LO DUAL TEMP GREASE

AsureQuality NSF H1 APPROVED

MPI C15 - (500ml) Part No. 7264

High performance extreme pressure food grade lubricant which is suitable for the lubrication of numerous applications in the food industry operating at both low or high temperatures -40°C to +180°C Freezers, chillers, ovens and sterilisers.

FG74 FG SILICONE LUBE - MPI C26

AsureQuality NSF H1 APPROVED

(400ml) Part No. 7274

Suitable for incidental food contact. Contains a high quality food grade approved silicone. Non-toxic, nonstaining, tasteless, odourless and contains no solvents. Prevents sticking and binding on all food equipment and machinery, slideways and stainless steel chutes.
