
Deliver well built. Go well beyond.

Tuatara Structures are leaders in the design and construction of structural steel buildings.

Founded in 2014, we are known for delivering robust, fit-for-purpose buildings New Zealand wide. Specialising in large-scale industrial, commercial and agri-space solutions, our team has the experience, capability and mettle to deliver outstanding results, every time.

Whatever your goals and challenges look like, we work alongside you to create a structure that will deliver a strong return on investment and become a lasting asset for your business.

We pride ourselves on being 'outperformers' in the industry – delivering better service, faster turn-arounds and higher quality results.

Outperform. Outlast.

**Above and beyond
is our core philosophy.
To that end, we:**

Outperform.

We respond faster and think smarter, starting with your goals and delivering optimal design and build solutions.

Outlast.

Quality design, materials and construction mean your building will be a resilient and long-lasting asset for your business.

Outplan.

We scope fully and price accurately from the get-go. You get the certainty of a fixed cost. We know we've done our homework so we're comfortable wearing the risk.

Outthink.

We design buildings from the inside-out to ensure they meet user needs, from long-term considerations to executional details..

Outwork.

We respond faster and think smarter, starting with your goals and delivering optimal design and build solutions.

“We found Tuatara a very flexible and easy company to work with. They comment well - what they said they built, they built. The big upside for us was that it was on time, and the end cost was what they quoted at the very beginning. We are extremely happy with our building”
– Murray Gain, Champion Freight.
