Precision from the Black Forest meets innovation,

as it has for more than 110 years

About **REINER**

Founded by Ernst Reiner in 1913, the family-owned company headquartered in Furtwangen in the Black Forest has grown to encompass the corporate areas of marking devices, stamps, scanners, and precision parts. REINER is a market leader in stamps and in OCR-printing and scanning systems in Germany and Europe. 200 motivated and qualified employees develop and produce to the highest quality standards.

New technologies and cutting-edge production facilities permit economic and highly precise production. With national and international offices, the three subsidiaries REINERSCT, IP Systeme, and Horray, REINER is represented on all important key markets in Europe. REINER products are used anywhere, in industry, public administration, and by banks!

YOUR CHOICE, YOUR INDIVIDUAL SOLUTION...

REINER marking technology Marking devices for any need: the handy and process-optimised solution for mobile use, just where it is needed.

MATERIAL		IMPRINT		INDUSTRY		DATA TRANSFER	
Paper	Cardboard	Text	Date/time	Public administration	Processing industry	PCset graphic	MOBILEset graphic
Wood	Metal	1D code	2D code	Trade	Agriculture and forestry	Labelling software	Word
Plastic	Glass	UV	Graphic Logo	Service/hospitality	IT	Excel	SAP ORACLE ERP
Stone/brick	Fabric/textiles			Health/social matters	Construction/crafts	Microsoft Dynamics LEXWARE WWS	
				Energy/environment/traffic	Finances/real estate		

There is an industrywide demand for functional marking solutions. They are needed to comply with laws or internal specifications, to permit tracking, or to monitor serial production. The handy REINER marking devices are characterised by their diverse usage options and long service lives.

The print images can be easily made to individual requirements. They are smear-resistant and will adhere to many different surfaces. Data transfer is possible through various systems.

PRINTABLE MATERIALS...

ABSORBENT SURFACES

Due to the REINER ink quality, very durable print images can be created on absorbent surfaces, such as wood, paper, pallets, or cardboard. The marking always remains optimally legible and thereby ensures smooth processes.

Beyond that, there is no longer any need for the elaborate use of labels. Printing protects the environment.

NON-ABSORBENT SURFACES

No smearing, no detachment. REINER marking devices produce good results on non-absorbent surfaces, such as glass, plastics, or metal.

The print images are made in the highest quality and adhere permanently – even if the external influences are detrimental. Inks are also available to match any task at hand: black for light- and yellow for dark-coloured surfaces, as well as UV ink for invisible imprints.

THE REINER INKS

REINER inkjet printing cartridges have a high yield. They produce perfect print images and are suitable for the application areas of wood, paper, cardboard, metal and plastic, as well as glass. An UV version is available. The cartridges can be replaced in a few simple steps.

Are you looking for the matching cartridge for your device? The printing cartridge finder will help you at once: www.reiner.de/ink

Would you like a sample print on your product? Contact your dealer www.reiner.de/representation

WHICH INDUSTRIES BENEFIT...

Cardboard marking in the packaging industry, product marking, labelling of construction parts, document marking, print images on plastics, integration in production lines, logo printing on pallets, or marking onto stainless steels – nearly all industry needed easy marking solutions.

The simpler printing on the marking is, the less time is needed further downstream in production, and the more quickly logistics will be able to act efficiently, quickly and without defects.

Direct printing with the REINER marking devices will noticeably simplify your work processes.

- Mobile at the workplaces where they are needed, thanks to high-performance rechargeable batteries.
- For optimal printing results thanks to high-quality ink.
- No extensive training needed thanks to intuitive handling.

WHICH SYSTEMS CAN BE USED FOR PRINTING...

PC-SET GRAPHIC

The PCset graphic software was developed for REINER products and is enclosed free of charge. It is intuitive to use and easy to operate.

Set out right away without any great configuration effort. Create your desired print images in the blink of an eye.

MOBILE-SET GRAPHIC

The free app permits the creation of print images and texts, as well as transfer to the *jetStamp*® 1025, *jetStamp*® graphic 970 and REINER 940 marking devices via an Android Smartphone.

Load the images right from your files, enjoy the ability to enter texts freely, and comfortably adjust the desired print sizes.

LABEL SOFTWARE

The enclosed Windows printer driver will install the mobile *jetStamp*® inkjet printer as a „normal“ printer in your system environment.

Continue working with the label software you have already used. All existing templates can be used and easily sent to the marking device.

INBOUND GOODS
OUTBOUND GOODS

GOODS MARKING

PRODUCTION

DOCUMENT MANAGEMENT

ADMINISTRATION

LOGISTICS

WORD

Mark your products easily with data previously created in Microsoft™ Word in future.

The mobile REINER printers have an integrated interface to permit transfer of Word contents, such as serial print data, by direct printing.

EXCEL

Do you use Excel to create marking templates? REINER permits simple data transfer and direct printing from Excel (in some cases, installation of Excel add-ins will be necessary).

You can create numbers, letters, 1D and 2D codes in Excel and print them on easily.

ERP / WWS SYSTEMS

The network-capable, mobile REINER inkjet printers can be easily integrated into existing ERP or goods management systems. They only need to have their programming custom-expanded.

Then the desired data can be transferred without delay. Processes and demand planning ensured by ERP or WWS are preserved.

jetStamp® 1025

THE ALL-IN-ONE SOLUTION

The large one: The mobile marking device *jetStamp*® 1025 is the ideal solution for printing on large areas, such as pallets, cardboard or packaging.

Entirely without cables or a fixed location, the *jetStamp*® 1025 can be used where it is needed. Integrated capping to seal the print head keeps ink from drying out even with longer breaks between uses.

The *jetStamp*® 1025 makes work easier in many ways. The integrated display shows the set print image easily legible at all times.

The print images can be transferred to the mobile marking device by Bluetooth or USB.

With its integrated multi-triggering, placed both on the side and at the centre of the handle, the device can be handled ergonomically and comfortably.

The *jetStamp*® 1025 prints date, time, texts, numbers, graphics, sequential 1D and 2D codes, multiline imprints

- 100% mobile
- Large imprint area
- Ideal for small and large objects
- Display-guided operation
- Large imprint memory

jetStamp[®] graphic 970

THE HANDY PRO

Handy and easy to program – the jetStamp[®] graphic 970 is an inkjet printer that marks documents or products easily and quickly, and at the highest print quality.

The device is sealed in the station to prevent the ink from drying out during longer work breaks. Its mobility makes it possible to integrate the jetStamp[®] graphic 970 in the process chain just where it is needed.

The specially developed MP-ink permits printing on different materials for perfect, machine-readable marking.

The required print images can be created quickly and easily at the computer and transferred by USB or Bluetooth.

A memory option for up to four imprints that can be switched easily via a setting wheel optimises work steps and saves working time.

The jetStamp[®] graphic 970 prints dates, times, texts, numbers, graphics, sequential 1D codes and 2D codes, multiline imprints

- For medium and small imprint areas
- Diverse imprint options
- Lightweight device
- The device is securely stored and placed well by the station
- Quick print image change

jetStamp® 990

THE QUICK AND HANDY ONE

The REINER *jetStamp*® 990 is characterised by rapid speed and particularly handy use thanks to its compact size.

The smallest device from the *jetStamp*® family permits quick and simple markings on any smooth or irregular surface. Like its bigger siblings, the ink-jet printer is characterised by optimal integration options:

it can be used mobile at the respective workplace integrated into the production line.

The robust *jetStamp*® 990 MP offers perfect flexibility with its memory options. Up to 25 customised texts or special functions can be stored in the device. Five of these slots are filled with pre-set example images at delivery.

The integrated LC display shows the set print image easily legible at all times in order to prevent marking errors.

The *jetStamp*® 990 prints date, time, texts, numbers, one- and two-line imprints

- Ideal for small areas
- Also prints on curved surfaces
- User-friendly
- Starting model
- Quick imprint

REINER 940

EVEN IF
IT IS ROUND

Quick and weighing only 530 g: The REINER 940 is a mobile inkjet printer that marks products and packaging easily and in the blink of an eye.

The rechargeable battery permits up to 1,000 imprints per charge, wirelessly and not bound to any one location. The device stores up to four

print images that can be switched easily with a setting wheel. Marking takes place by rolling the REINER 940 over the surface and is even possible contact-free.

Clever: Since different hand movement speeds prevent perfectly even work, integrated sensors regulate ink supply for perfect machine-readable marking.

Integrated capping to seal the print head keeps ink from drying out even with longer breaks between uses.

The REINER 940 prints date, time, texts, numbers, graphics, sequential 1D codes and 2D codes, multiline imprints

- Ideal for large and curved surfaces
- Long imprint area
- Mobile or stationary marking
- Imprint also possible by pulling motion
- Suitable for left- and right-handed users

Technical details

Dimensions (L x W x H):	47 x 147 x 221 mm
Weight:	approx. 530 g
Printing technology:	Inkjet

speed-i-Jet 798

THE LITTLE FAST ONE

Complete independence: The speed-i-Jet 798 is the handy marking solution for mobile printing of custom texts, sequential numbers, date, and time.

The print image can be created easily on the computer before use and transmitted via USB.

Absorbent and even irregular surfaces can be marked directly and individually.

The handy pocket format fits into any work clothing.

Clever: In spite of different hand motion speeds, all the print images will appear in optimal quality.

The speed-i-Jet 798 prints date, time, texts, numbers, imprints in one line

- Handy pocket format
- 100% mobile
- User-friendly
- Simple handling
- Suitable for left- and right-handed users

The speed-i-Jet 798 is easy to operate: Simply pull it across the surfaces to be printed on and push the red button. Done!

Technical details

Dimensions (L x W x H):	173 x 32 x 43 mm
Weight:	approx. 125 g
Printing technology:	Inkjet
Number height:	3.2 mm
Max. imprint size:	40 characters, in one line
Print resolution:	96 dpi
Battery capacity:	up to 1,000 imprints

THE MATCHING INK FOR YOUR USE...

When material matters REINER offers high-quality inks matching the surface of the material to be marked: light inks for dark surfaces, dark inks for light surfaces, and UV ink that is only visible under UV light.

Would you like a little more? Using the matching REINER accessories permits precise adjustment of the mobile marking devices to their areas of use. The „small and large helpers“ facilitate and secure repeating work processes and support ergonomic workplace design.
